

Smart Solutions. Powerful Products.

PBV[®] Series 5700/6700 Three-Piece Trunnion Supported Ball Valves

Manufacturer of Quality Valve Products Around the Globe

At Forum™ Energy Technologies we are committed to improving our clients' operational and financial performance by supplying the most comprehensive range of valve products in the industry through our family of trusted valve brands.

Engineering Expertise

Forum™ utilizes the latest state of the art engineering software to provide custom design services for any application. Finite element analysis is just one of many Design Verification Tools FET uses for designing valves to specific customer requirements.

CAD & NC Capabilities

With FET's fast and efficient workflow, CAD drawings can be released to the network for manufacturing and purchasing. All computer generated machine programs can be quickly changed for weld overlays or other processes. The result is faster deliveries.

Accurate Inventories

Daily cycle counting & order picking using wireless barcode guns and automated part delivery systems results in more accurate inventories and faster product delivery.

Quality Control

All FET Companies manufacture quality products designed and tested to meet the standards of Qualifying Authorities around the world. Advanced engineering and our Quality Management System assure that our valve products continue to exceed your expectations for performance.

Customer Service

Forum™'s Customer Service Department is fully staffed with trained customer service representatives ready to help you with your ordering information, technical specifications and logistics.

PBV® Repair Kits

Spare parts are available for quick delivery. Orders with valve serial numbers will ensure the correct parts are shipped. Contact your PBV® salesperson for more information.

Item	Description
1	CE mark and notified body required for delivery to EEC.
2	Figure number describes valve construction.
3	Nominal pipe size in inches
4	Max. operating pressure at min. valve design temperature
5	Valve features double block and bleed (DBB) and firesafe standards.
6	Body and trim materials
7	PBV® serial number
8	PBV® manufacturing order
9	API 6D or 6A monogram stamp
10	ANSI Pressure Class
11	Max. operating pressure at max. valve design temperature
12	Date of assembly MM/DD/YY

Our Quality Commitment...

Forum™ Energy Technologies is dedicated to continually improving their state-of-the-art engineering and manufacturing capabilities to improve the overall quality of their products and customer service. FET's entire global network of flow control experts consist of highly trained technicians, engineers, and superior testing laboratories to ensure that all products supplied to our customers are 100% in accordance with industry standards as well as our own Quality Management System.

Ball Valve Stem Torques

Series 5700/6700 • 2"FP- 36"FP, Class 150 thru 2500

To calculate torque at any pressure use the formula located under Class for each valve size.

Example: An 8" Class 600 at 1100 psi = 4060 + (5.64 x 1100) = 10,264 in.-lbs.

G/PTFE Seats, Class 150-300, 2" - 14"

Port Size (in.)	Class 150 - 300 Stem Torque Formula, (in.-lbs.)	Class 150 Stem Torque (in.- lbs.)	Class 300 Stem Torque (in.- lbs.)
	MOP (psi)	285	740
2	$617 + 0.55*\Delta P$	770	1020
3	$1034 + 0.87*\Delta P$	1280	1680
4	$1450 + 1.56*\Delta P$	1890	2600
6	$3352 + 2.80*\Delta P$	4150	5420
8	$4060 + 5.64*\Delta P$	5670	8230
10	$5837 + 8.29*\Delta P$	8200	11,970
12	$12019 + 10.75*\Delta P$	15,080	19,970
14	$16327 + 12.36*\Delta P$	19,850	25,470

G/PTFE Seats, Class 150-300, 16" - 36"

Port Size (in.)	Class 150 - 300 Stem Torque Formula, (in.-lbs.)	Class 150 Stem Torque (in.- lbs.)	Class 300 Stem Torque (in.- lbs.)

34	$206700 + (258*(P-700))$	407,940	—	—	—	—	—	—
36	$216215 + (270*(P-700))$	426,280	—	—	—	—	—	—

Torque values are for new valves with clean water.

No additional safety factors have been added.

For powered actuators, it is recommended to add an additional 25% minimum.

For dirty service, add an additional 25% minimum.

For dry gas service, add 50% minimum.

To prevent stem side loading and eliminate potential stem galling, the following tolerances for mounting actuators are recommended.

- Actuator mounting bracket flanges must be parallel within .015".
- The max allowed runout on the stem coupling bores are .008".

PBV® Engineering Excellence at Work

PBV® Series 5700/6700 Three-Piece, Side-Entry, Trunnion Ball Valve

2"- 56" ANSI Class 150/300, 600, 900, 1500 & 2500 • Full and Standard Port

PBV®'s trunnion ball valves are available in a variety of materials and configurations to meet your specific project requirements. Typical construction is shown here.

Features

Materials of Construction

PBV® manufactures trunnion ball valves using a full range of carbon, alloy and stainless materials. Our commodity valves are manufactured using dual rated A105/A350 LF2 steel, B7M/ 2HM fasteners, and 3 mil ENP carbon steel trim on 6" and larger. Material test reports in accordance with EN10204 3.1b are available on each serialized valve.

NACE Compliance

The demand for valves to be resistant to sulfide stress cracking, and to perform in corrosive hydrocarbon environments, has become commonplace. Facilities handling H₂S bearing hydrocarbons have increased dramatically over recent years. Hydrogen sulfide concentration, total system pressure, application temperature, existence of elemental sulfur, and chloride content all have a bearing on appropriate material selection in this severe environment.

All materials used by PBV® are in accordance with the pre-qualified materials identified in NACE MR0175/ISO 15156. In order to ensure compliance customers must provide application specific operating conditions.

Inclusive to the above, valves with bore diameters 4" and smaller are supplied standard with Stainless Steel balls, seats and stems. Material type selected may vary depending on design requirements.

Emergency Sealant Injection

A secondary sealant injection system for stem seals is a standard feature on all PBV® Trunnion ball valves. On valves 6" bore and larger, the seat emergency sealant system shown here is a standard feature. A similar system is available for sizes 2" thru 4" on request. These systems are made available for the sole purpose of providing a temporary seal to an otherwise damaged area. PBV® ball valves require no lubrication under ordinary circumstances.

Anti-Blowout

Blowout proof stems are a standard feature of all PBV® ball valves.

Certification of Quality and Design

Quality systems are a way of life at PBV®. In addition, PBV® functions under the requirements of an API Q1 quality program. Our facilities and quality programs are always open to customer audits. The complete PBV® trunnion ball valve line has been designed and tested to ensure that the external and through-bore maximum allowable leakage rates are maintained in the event of a fire. PBV® has equipment and facilities to firesafe test our products to the edition of API 607 and API 6FA firesafe standards.

All API 6D, API 6A, CE PED and other licenses are maintained on a current basis. Each and every PBV® trunnion ball valve is monogrammed and serialized under our API 6D-0129 or our API 6A-0383 license numbers.

API 6D

API 6A

ISO 9001:2008

Features

PBV®'s Patented Seat Technologies

PBV® provides the latest in valve seat technology. Other seat designs are also available to meet your application requirements. This makes PBV® one of the most flexible manufacturers in terms of available

seat configurations and designs. PBV®'s metal-to-metal seating technologies and manufacturing capabilities continue to lead the way in industry innovations where severe service applications are required.

Compseal-0

The PBV® Compseal-0 design is ideal for applications where non-standard seat materials are required for the service conditions. The different materials give added flexibility for faster delivery in demanding applications. The seat inserts allow for a variety of materials to be used while still complying to API seat test requirements for "bubble-tight shut-off". Nylon Compseal-0 designs are standard on sizes 14" and larger.

Compseal-1

PBV® Compseal-1 seat designs are for applications that require redundant sealing when access to a valve is limited or start up conditions are known to have debris in the line. Lower torque and low pressure shut-off are often achieved utilizing this design while providing customers with zero leakage reliability at an affordable price.

Metal-To-Metal Seats

There are a number of services that require metal-to-metal seat technology. PBV® has extensive experience in the supply of valves for applications such as high temperature cokers, control valve applications and in corrosive and/or erosive environments. PBV® achieves the metal-to-metal seating technology through the use of various hard face material on the ball and seat face.

Features

Locking Devices

Locking devices are standard on all PBV® trunnion ball valves. The designs shown depict the locking feature for both lever-operated and gear-operated valves. In addition, a multiple lock template can accommodate safety requirements when more than one person needs reassurance of security. Special safety interlock devices are also available.

Actuation

PBV® ball valves are built to easily accept pneumatic, electric, hydraulic or gas-over-oil actuators. Break-away and run torque, which normally affect actuator sizing, are minimized to allow for economical actuator packages. Actuated ball valves may be supplied directly from PBV® under a single warranty.

Valve/Actuator assemblies can be tested to customer requirements at PBV® before shipment to the job site. The valves shown (right) are just a few of many severe service ball valves PBV® produced for the United States Department of Energy, Strategic Petroleum Reserves, complete with gear operators built and tested to DOE specifications.

Weld Overlay Technology

This technology is cost effective for ball valves in highly corrosive or erosive services. The life of a valve can be considerably extended at a fraction of the cost of a solid corrosion resistant alloy valve by the application of a weld overlay to valve internal surfaces.

If you are currently using solid stainless steel or other high alloy valves the use of this technology could result in considerable savings with no sacrifice to service life or performance. Offered on valves 6" and larger.

Welding is performed in accordance with ASME BPV Section 9.

Double Block and Bleed Valves

All PBV® trunnion mounted ball valves are designed and manufactured to facilitate block and bleed applications in the closed position only. In addition, valves 6" and larger can be completely flushed with the valve under pressure and in the closed position. This is achieved by utilizing the drain valve and vent hole in combination. The illustration shows both the upstream pressure (P_u) and the downstream pressure (P_d) being held independently from the body pressure (P_b). The piston effect principle illustrated assures bubble tight sealing simultaneously on both sides of the ball.

Shown In Closed Position.

Valve Cavity Pressure Relief

When a trunnion ball valve is in the closed position, media will be trapped in the body cavity. Unless this media is drained, it will be subjected to thermal expansion and contraction. As the temperature rises, the trapped media desires to expand and the pressure increases in the area shown as (P_b). In order to avoid excessive pressure build-up, the PBV® seats are designed to self-relieve, allowing the media in the body to escape to the pipeline. In this case, we have shown it to relieve to the downstream side (P_d). This self-relieving seat design feature is standard on all PBV® trunnion ball valves.

Shown In Closed Position.

Options

Buried Service

The photos and illustrations shown here typify the designs used for adapting a PBV® ball valve for buried service.

PBV® manufactures hi-head extensions exactly in accordance with customer specifications or according to our own engineering and manufacturing designs.

PBV® has the capabilities to produce giants like the one pictured at right. PBV® produced two 48" Class 600 ball valves with 96" extended stems for the Williams Energy, "Sundance Pipeline Project."

PBV® Ball Valves For Cryogenic Service

For service temperatures below -50°F, PBV®'s standard design includes lip seals and stem extensions using selected materials for your application. The 12" gas column shown at right is a standard feature to isolate the gear operator and stem seals from the cold media.

PBV® provides extended stems which are used in a variety of applications.

Subsea Valve

Splash Zone Valve

PBV® supplies subsea valves to individual customer requirements or to our own internal standards. Coatings, fastener protection, gear boxes with pressure equalizing devices, protected drive stems and customized ROV couplings are all components of design considered for PBV® ball valves being used in subsea service.

Large Diameter Special Features

Seat Design

The necessary thrust required for proper sealing of the seat to the ball at low pressure is provided by spiral springs (See Illustration 1). At high pressure the thrust of the seat to the ball is increased by the pressure of service medium in the pipeline.

Primary seat sealing is provided by a soft sealing ring of different rubber types. Alternatively, a PTFE hard sealing ring (or PTFE modifications) can be used for primary sealing. Secondary sealing is provided by metal-to-metal contact of the seat to the ball.

Emergency sealant, which can be injected between the seat and ball, can be used as tertiary sealing. Seats with soft sealing rings are automatically supplied as DPE design (See Illustration 2). DPE design means, that if the upstream seat is damaged, function of a ball valve is still secured by a downstream seat.

Illustration No. 1

Two-Way Double Acting

To meet customers requirements, often times a two-way seat design is required. This design allows for downstream seat sealing in the case of an upstream seat failing to seal. This design also provides for the function of testing a valve in-line and in full open position with the drain or bleed valve open to the air.

Fully Welded Body Design

Fully welded three-piece body designs are available in larger sizes.

Special Under Water Gas Testing

Valves can be air or gas tested under water in a special chamber.

Illustration No. 2

X-ray testing and evaluation of castings are performed at PBV's Engineering and Testing Facility in Stafford, Texas.

Pressure Testing Stations and Qualified Personnel are utilized to provide consistent compliance to industry test criteria for every valve.

Design Standards and Specifications

Valve designs covered in this catalog conform to the following industry standards and specifications.

American Petroleum Institute

- API 6D • Specifications for pipeline valves
- API 607 • Fire test for soft-seated ball valves (Div. of Refining)
- API 6FA • Fire test for valves (Div. of Production)
- API Q1 • Specifications for quality programs
- API 6A • Specifications for Wellhead and Christmas Tree Equipment

Manufacturers Standardization Society

- MSS SP-25 • Standard marking system for valves
- MSS SP-55 • Quality Standard for Steel Castings

National Association of Corrosion Engineers

- NACE MR0175 2002 • Sulfide stress cracking resistant metallic materials for oilfield equipment

American National Standard

- ASME/ANSI B 16.10 • Face-to-face and end-to-end dimensions on ferrous valves
- ASME/ANSI B 16.5 • Steel pipe flanges and flanged fittings
- ASME/ANSI B 16.34 • Steel valves-flanged and butt-weld end
- ASME/ANSI B 31.1 • Power Piping
- ASME B 31.3 • Process Piping
- ASME B 31.4 • Pipeline transportation systems for liquid
- ASME B 31.8 • Gas transmission and distribution piping systems

Code of Federal Regulations

- Title 49-Part 192 • Transportation of natural and other gas by pipeline: Minimum federal safety standards

Parts for Low Pressure Small Size Diameter Valves

Series 6700 • 2"-4", Class 150 • 2", Class 300

No.	Description	Material	Spares
1	Body	A105/A350 LF2	
2	Closure	A105/A350 LF2	
4	Ball	316SS	
5	Stem	316SS	
6	Seat Ring Sub Assembly	316SS-G/PTFE	S
9	Trunnion	4130 ENP	
10	Gland	4130 ENP	
12	Adapter Plate	A36	
20	Stem Key	Carbon Steel	
25	Stem Thrust Washer	Graphite	S
28	DU Bearing	DU Dry Bearing	
31	Seat/Stem Spring	X-750	
32	Body O-ring	Viton®	S
33	Seat O-ring	Viton®	S
34	Stem O-ring	Viton®	S
35	Gland & Trunnion O-ring	Viton®	S
39	Body Cap Screw	A574 Modified	
43	Gland Cap Screw	A574 Modified	
44	Adapter Plate Cap Screw	A574 Modified	
45	Trunnion Cap Screw	A574 Modified	
46	Stem Key Cap Screw	Carbon Steel	
49	Stem Grease Fitting	Carbon Steel	
50	Body Grease Fitting	Carbon Steel	
51	Check Valve	Stainless Steel	
54	Drain Valve	Carbon Steel	
60	Handle	Carbon Steel	
62	Indicator Screw	Carbon Steel	
63	Retainer Washer	Carbon Steel	
64	Name Plate	Stainless Steel	
65	Drive Screw	Stainless Steel	
67	Handle Adapter	Carbon Steel	
69	Lock Screw	Carbon Steel	
70	Body Gasket	Graphite	S
71	Gland & Trunnion Gasket	Graphite	S
72	Stem Packing	Graphite	S

Note: Materials listed are typical for stainless steel trim valves. Stronger materials may be used to satisfy design requirements.

Assemblies are illustrations only.
Parts may vary according to design.

Small Bore Valve Design Utilizes Tapped Holes In The End Flanges to Maintain API 6D Face-to-Face Specifications

Small diameter trunnion ball valves often require tapped holes on the end flanges in order to maintain the face-to-face dimensions specified in API 6D. The full bore valves have tapped holes in accordance with API 6D instead of straight holes on both ends. The recommended stud length is listed at right.

For Reference Only Stud Length to Install Valve

Bore Size	Stud Bolt Size	Quantity/Flange
2-150	5/8-11 UNC X 2.25	4
3-150	5/8-11 UNC X 2.38	4
4-150	5/8-11 UNC X 2.50	8
2-300	5/8-11 UNC X 2.50	8

Parts for High Pressure Small Size Diameter Valves

Series 5700/6700 • 3"FP-4"FP, Class 300 • 2"-4", Class 600, 900, 1500 and 2500

No.	Description	Material	Spares

Parts for Large Size Diameter Valves

Series 5700/6700 • 14"FP-56"FP, Class 150, 300, 600, 900 and 1500 • 12", Class 2500

No.	Description	Material	Spares
1	Body	A105/A350 LF2	
2	Closure/Flanged End	A105/A350 LF2	
4	Ball	A105/A350 LF2 ENP	
5	Stem	4130 ENP	
6	Seat Ring Sub Assembly	A105/A350 LF2 ENP G/PTFE or Nylon	S
9	Bearing Retainer	Carbon Steel	
10	Gland	4130 ENP	
11	Bushing	Carbon Steel	
12	Adapter Plate	A36	
18	Gland Pin	Carbon Steel	
20	Stem Key	Carbon Steel	
22	Ball Thrust Washer	Phenolic	S
25	Stem Thrust Washer	Phenolic	S
28	DU Bearing	DU Dry Bearing	
31	Seat Spring	X-750	
32	Body O-ring	Viton®	S
33	Seat O-ring	Viton®	S
34	Stem O-ring	Viton®	S
35	Gland O-ring	Viton®	S
36	Emergency Sealant O-ring	Viton®	S
38	Location Stud	A193 B7M	
39	Body Stud	A193 B7M	
40	Body Nut	A194 2HM	
43	Gland Cap Screw	A574 Modified	
44	Adapter Plate Cap Screw	A574 Modified	
46	Stem Key Cap Screw	Carbon Steel	
47	Gear Stud	A193 B7	
48	Gear/Adapter Plate Nut	A194 2H	
49	Stem Grease Fitting	Carbon Steel	
50	Seat Grease Fitting	Carbon Steel	
51	Check Valve	Stainless Steel	
52	Vent Plug	Carbon Steel	
53	Lifting Lug Stud	A193 B7M	
54	Drain Valve	Carbon Steel	
55	Lifting Lug	Carbon Steel	
56	Support Leg	Carbon Steel	
57	Worm Gear Operator	Commercial	
60	Handwheel	Carbon Steel	
64	Name Plate	Stainless Steel	
65	Drive Screw	Stainless Steel	
70	Body Gasket	Graphite	S
71	Gland & Trunnion Gasket	Graphite	S
72	Stem Packing	Graphite	S

Note: Materials listed are typical for carbon steel valves. Ball, stem & seat rings will be 316, 17-4PH, or XM-19 or stainless steel trim depending on design requirements.

Assemblies are illustrations only.
Parts may vary according to design.

Bore Sizes • Shipping Information

Bore sizes in PBV® ball valves conform to API 6D. They present an unobstructed flow path ideally suited for pigging when ordered in the full bore configuration.

Nominal Bore Size (in.)	Actual Bore Size (in.)

Contact your PBV® salesperson for additional weights/sizes larger than 24".

- Notes:**
- 1) Weights and dimensions given for flanged end valves only.
 - 2) Valves sizes 2"x2" through 6"x4" in all Classes are with Lever Operators. Valves sizes 6"x6" and larger in all Classes are with Gear Operators.
 - 3) Shipping dimensions do not include Lever or Handwheel for Gear Operator.

The above weights and dimensions are made available for the purpose of estimating shipping expenses. These numbers are near approximations for the valve only exclusive of crating or palletizing.

Temperature Conversion Chart

Conversion Directions Locate temperature in center column. If in degrees Celsius, read Fahrenheit equivalent in right hand column.

If in degrees Fahrenheit, read Celsius equivalent in left hand column.

These formulas may be used to convert from one scale to another: Fahrenheit = (1.8 x TC) + 32 Celsius = (TF - 32)/1.8

Our goal is to become the leading provider of mission critical oilfield products and related services in terms of customer satisfaction, safety and financial performance.

Our experienced management team and employees are dedicated to solving our customers' problems. We invest in long term relationships and cooperate on product development with our clients, we consider them our partners.

OUR CORE VALUES

Integrity: In everything we do, in every interaction, both internally and externally, we strive to operate with the upmost integrity and mutual respect.

Long-term view: We are building our company for the long-term, a company that we can be proud of.

Open communication: We believe partnerships with our customers and co-workers must be based on trust, professionalism and transparency.

Customer focused: Our products enhance our customer's performance and we listen to their needs and work with them to solve their challenges.

Good place to work: We are committed to creating a workplace that fosters innovation, teamwork and pride. Every team member is integral to our success and is treated equally and fairly.

No one gets hurt: The safety of our employees and customers is our first priority coupled with a healthy respect for the environment.
