OUR TEAM

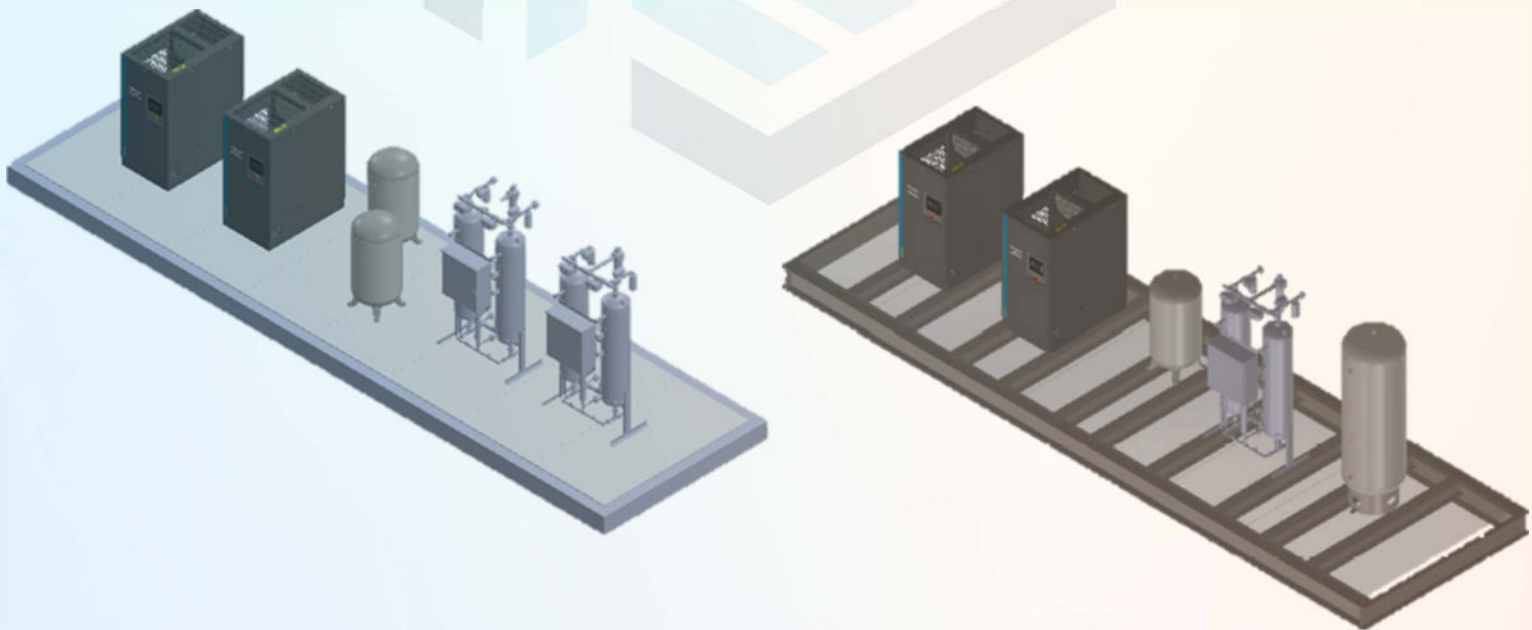

The I-CON team can provide a full turn-key design built solution for all your compressed air, nitrogen, or oxygen generated needs.

Over the years, companies have to make changes to their process as they grow and expand. Many times these companies don't have the space or building capacity to add the equipment required for these needed changes.

I-CON can help support in these growing requirements.

Turn-key solutions include:

- ◉ Determine site location requirements for plant improvement or expansion
 - ◉ Select required equipment and design layout
 - ◉ Design layout for skid frame
- ◉ Design all necessary piping, electrical, controls, HVAC, fabrication, and building requirements
- ◉ Testing and rotating of equipment to perform as required
- ◉ On-site startup and training of equipment provided

Please reach out for more details on our full capabilities or if a quote is needed.
