

Premium Quality. Unparalleled Performance. Engineered for Efficiency.

Prevent condensate from entering the compressed air production line with a comprehensive and environmentally conscious purification system, manufactured by Walker Filtration.

With the CondensSmart Drain Series and the SmartSep Oil-Water Separator Series, condensate management has never been easier. Walker Filtration's condensate management line includes a broad range of competitively priced models, with reliability and ease of use at the forefront of their design. Engineered with smart technology to enhance compressed air system operation, our products help reduce operational costs and environmental impact.

Our customers' needs are always our top priority. Our technical, sales and support teams are available to provide exceptional customer service and solutions throughout Walker Filtration's global network.
